

placed.

Current hiring process

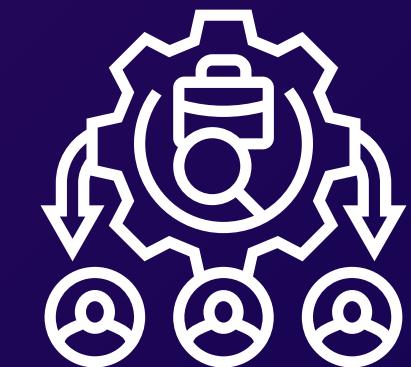

Job post goes live
1000s apply

Manual resume screening
Time wasted on poor fits

Calls & coordination
Done manually, one by one

1:300 success rate
1 right hire per 300
applicants

We spoke to 100s of Recruiters

“ 1000s of profiles that are *impossible to screen* at once ”

“ Very high chances of *missing out* on potential candidates ”

“ The entire process is *heavily time consuming* ”

“ Hard to give *timely feedback* to all the candidates is a big issue ”

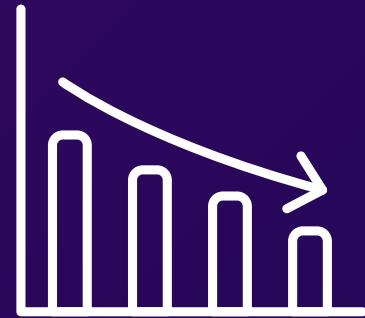

Hiring is broken

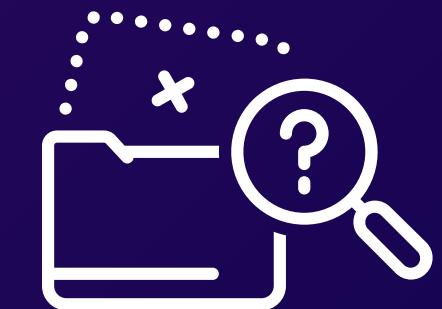

**70% of recruiter
time is wasted
screening
unqualified profiles**

**Interview coordination
takes hours**

**Candidates drop off due to
slow follow-ups**

**Talent gets missed,
not matched**

Introducing

An end to end hiring platform to tackle all your
recruitment needs. Powered by AI

Meet Veda

From Job Post to Interview — in minutes

it's hard because of how?

What can Veda do?

How does placed work?

1

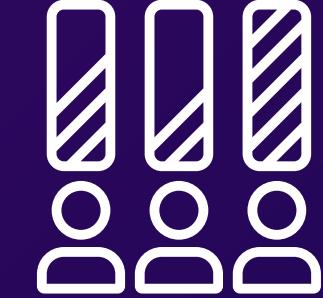

Candidate uploads
their resume on Placed.

2

Our AI analyzes the resume to
determine the candidate's ideal role
and experience range.

3

Based on the analysis, a set of skill-based tests
is assigned. The candidate is then ranked
against others based on performance.

4

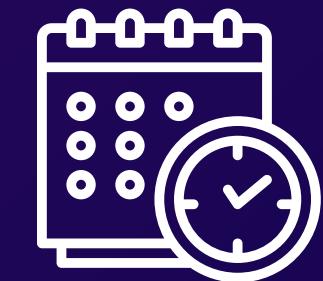

The company uploads
the job description (JD)
on the Placed platform.

5

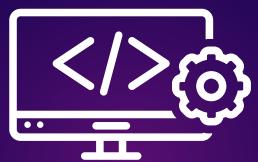

Veda, our AI recruiter, scans through millions of
profiles and recommends the best-matched
candidates—ranked according to the JD

6

Veda schedules and aligns
interviews with shortlisted
candidates given by the company
